PROFILE

Senior full-stack software engineer with 4+ years of experience building and operating production systems across financial services, education, and commerce. I work across frontend, backend, integrations, application security, and continuous delivery. In my personal projects, I build AI-powered platforms and automated infrastructure.

EXPERIENCE · SELECTED HIGHLIGHTS

Eldar · Newpay / Fiserv Apr. 2023 — Present

Full Stack Software Engineer

- Selected the stack and built the Next.js/TypeScript frontend for a production banking platform that replaced a legacy PHP system.
- Designed and developed a production Android/iOS app with React Native and Expo, offline TOTP generation, and secure storage.
- Modernized five Java/Spring APIs to remediate vulnerabilities and completed two financial APIs delivered to production, including AWS SQS notifications.

Start University Mar. 2023 — Feb. 2024

Software Engineer · Contract

- Built the Botmaker–CRM integration, with APIs and webhooks synchronizing conversations and lead data in real time.
- Designed and built an AI assistant used in production to suggest replies to operators, including its interface, backend, and AI service integration.

CO.FA.LO.ZA. Ltda. May. 2022 — Mar. 2023

Software Engineer

- Enabled internal development of the pharmacy sales platform with an Angular/Symfony environment connected to COBOL, repositories, and documentation.
- Automated daily order reports and metrics with Bash, cron, and MySQL, giving management earlier visibility into business activity.
