PROFILE

Senior full-stack software engineer experienced in building secure, scalable applications end to end. In personal projects, I combine product, applied AI, and platform engineering to turn real problems into reliable systems that run in production.

EXPERIENCE

Senior Full-Stack Software Engineer · Eldar	2023 — Present
	I build and maintain applications for the financial industry with Java and Spring, working across development, integration, continuous delivery, security, observability, and operations with multidisciplinary teams.
Freelance Full-Stack Software Engineer · Start University	2023 — 2024
	I developed complete web applications with .NET, C#, Entity Framework, SQL Server, and JavaScript; designed REST APIs; and integrated chatbots and generative AI experiences.
Full-Stack Software Engineer · COFALOZA LTDA	2022 — 2023
	I developed web systems with Angular, Symfony, TypeScript, PHP, and MySQL; integrated legacy systems, automated operational tasks, and worked on debugging and observability in Linux.
