

IGNACIO DAMIÁN GONZÁLEZ

SOFTWARE ENGINEER
DEVOPS

SKILLS

WINDOWS - GNU/LINUX - POO - MVC
KUBERNETES - AWS
JAVA - SPRING - PHP
SPRING BOOT - SPRING SECURITY
MAVEN - JSP - THYMELEAF
HTML - CSS - JAVASCRIPT
ANGULAR - .NET - .NET CORE
C# - ENTITY FRAMEWORK - LINQ
REST APIs - JIRA - DYNATRACE
SERVICENOW - JENKINS - GIT
GITLAB - DOCKER - SONATYPE
FORTIFY SCA - SQL SERVER
MYSQL - SYMFONY - NODE.JS
JQUERY - BOOTSTRAP
SCRUM - VULNERABILITY MANAGEMENT
SOFTWARE DOCUMENTATION
INFRASTRUCTURE AS CODE (IaC)

COURSES

PLATZI

Kubernetes
Profesional de Git y GitHub
Programación en Bash Shell
Introducción a AWS - Fundamentos de Cloud Computing
Fundamentos de Entity Framework
Docker
APIs con .NET
Jenkins

UTN

Desarrollo con Angular
Desarrollo en React JS
DevOps, integracion y agilidad continua

ACADEMIC BACKGROUND

UNIVERSITY OF LA MATANZA

Technical Degree in Web Development
Completed (2020 - 2022)

WORK EXPERIENCE

ELDAR

CLIENTS: FISERV & PRISMA

Software Engineer & DevOps
April 2023 - Present

Development and maintenance in Java and Spring, including Boot and Security. Maven for dependency management and security with Spring Security. Resolved vulnerabilities with Sonatype, Fortify SCA, and WebInspect. Created technical documentation and migrated repositories to GitLab. Managed team CI/CD with Jenkins, API testing with Postman. Renewed certificates. Jira for agile management, Dynatrace for monitoring, and ServiceNow for IT services. Collaborated on resolving issues in Linux servers, Apache, WildFly, secure and scalable application development. Scripting and more.

START UNIVERSITY

Freelance Web Development
March 2023 - February 2024

Development and maintenance of web applications in .NET Framework 4.7 to .NET 6. Used Entity Framework and LINQ for data management. Programming in C#, following best practices. Implemented RESTful APIs and created technical documentation. Used JavaScript and jQuery for responsive interfaces. Integrated chatbots and managed Microsoft SQL Server. UX integration with generative AI. Expanded my experience in technologies and complex systems.

COFALOZA LTDA

Software Engineer
May 2022 - March 2023

Development in Symfony and Angular, handling JavaScript, TypeScript, jQuery, PHP, HTML, CSS. Analysis and debugging of systems, maintenance of MySQL databases. Integrations with COBOL, monitoring with NewRelic in Linux environments. Automation with bash scripts and crons, applying agile methodologies and creating technical documentation. Version control with Git.
